

Everything concussion: Guiding physicians and healthcare professionals

Get the most up to date information regarding the astute detection, assessment and management of concussion. This panel type presentation brings together concussion specialists from a wide range of fields to share evidence-informed knowledge about concussion assessment, management and intervention.

You will be hearing from a panel of:

- Neuropsychologists
- Neuro-optometrists
- Clinical counsellors
- Sport medicine physicians
- Concussion research experts
- Occupational therapists
- Physiotherapists
- Vestibular therapists
- Kinesiologists

It is hoped that the audience will leave with:

- a better understanding of the relationships between date and mechanism of injury
- post-injury examinations
- the recovery process
- baseline testing and its role in the return to play process , and much more.

The purpose of this presentation is purely a philanthropic initiative with the goal of spreading an accurate message regarding concussions. The cost will be FREE for the audience to attend. The intent is to inspire and influence change in helping to shift the paradigm in how concussions are understood by providing quality driven, aligned, and consistent messaging. Setting the stage early for recovery is paramount as this can change the trajectory of recovery.

*“Quality is never an accident;
it is always the result of
high intention, sincere
effort, intelligent direction
and skillful execution; it
represents the wise choice of
many alternatives”*
